

Black Gator® Bypass Tubing

Black Gator® Bypass Tubing is positioned alongside the Electrical Submersible Pump (ESP) assembly to provide unobstructed, fully protected passage for coiled tubing or wireline intervention tools. The Bypass Tubing has a smooth internal profile to remove the possibility of hanging up intervention tools.

PFT F2J premium (metal-to-metal seal) flush joint threads are provided as a standard.

FEATURES

F2J Premium Box x Pin thread connections

Other threads available on request

15 ft standard length, 10 ft for 2-1/8" tubing OD

Flush outside diameter to maximize space

SPECIFICATIONS

Low alloy steel or 13Cr material options to specification API 5CT

5,000 psi MWP

2-1/8" OD tubing offered in carbon steel and 316 stainless steel materials
