

Black Gator® Bypass Safety Clamp

The Black Gator® Bypass Safety Clamp supports the weight of the bypass tubing or the string during assembly of the bypass system, when landed on the ESP Work Table (stove pipe). It has interchangeable tubing dies to grip the desired bypass tubing. With a safe working load of 40,000 lbs, the safety clamp is suited for use on systems with heavy tailpipe or for dual Y-Tool ESP applications.

FEATURES

Lightweight

Lifting handle locations

Common body with interchangeable slip dies for 2-3/8" and 2-7/8" tubing

4 slip dies per assembly
