

Black Gator® Wireline Plug Hammer

The Black Gator® Wireline Plug Hammer is deployed as an option above the Black Gator® Wireline Logging Plug and is designed to tap the logging plug into place. It is attached to the wireline string at the desired location above the tool string (distance from Y-Tool to the bottom of the logging interval). The wireline hammer has inserts (hammer inserts) to secure it to the appropriate size wireline cable.

FEATURES

Slimline design (1.50" OD) for small tubing

1.375" external fish neck

Brass insert for gripping wireline / slickline

Used in conjunction with the Black Gator® Wireline Logging Plug
