

Black Gator® Wireline Plug Tool Catcher

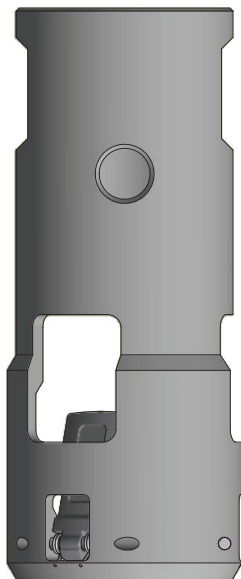

The Black Gator® Wireline Plug Tool Catcher is an option that can be used with the Black Gator® Wireline Logging Plug. This allows the logging tool string rope socket to latch to the logging plug with retrieval over-pull. This ensures that if the weak point of the wireline breaks during retrieval the logging tool string will not be dropped downhole. The tool catcher is a universal design and can catch 1.000" to 1.750" external fish neck sizes.

FEATURES

- Spring-loaded fingers
- Catches 1.00" to 1.750" external fish necks
- 2.305" OD
- Fits Black Gator® Wireline Logging Plug by replacing plug bottom bullnose
