

Black Gator® Telescopic Swivel

The Black Gator® Telescopic Swivel is made up to the Bypass Nipple in an Electrical Submersible Pump (ESP) bypass system. This allows for the rotational make-up of the bypass tubing, at the well site, to entire the assembly of the bypass system. The adjustable swivel has a 15 inch stroke to allow for adjustment of the bypass tubing during well completion space-out operations.

FEATURES

Option of load-bearing version for dual completions or tailpipe below the ESP
 Designs for 9-5/8" and 7" Y-Tool bypass systems

Reducing crossovers available for smaller bypass tubing

SPECIFICATIONS

Low alloy steel or 13Cr material options to specification API 5CT

15" stroke
