

Black Gator® Pod Hanger Assembly

The Black Gator® Pod Hanger Assembly is made up to the electrical submersible pump (ESP) and the production tubing. The Black Gator® Pod Hanger Assembly is comprised of the following:

- 6 ft. handling sub with a top connection to make up to the production tubing
- Optional nipple for testing the production tubing above the pod hanger assembly
- 8 ft. pup joint above the pod hanger to allow for deflection due to the hanger offset bore and to provide space for a packer-style electrical connector
- Pod hanger in multiple sizes
- 6 ft. pup joint below the pod hanger
- Optional offset union to accommodate the electrical connector penetration
- Optional 6 ft. or 15 ft. pup joint to accommodate the application of an offset union
- Optional crossover for the pump discharge head
