

## Black Gator® Pod Hanger Seal Sleeve and Lockdown Ring Assembly

The Black Gator® Pod Hanger Seal Sleeve and Lockdown Ring Assembly are located at the top of the pod casing. The seal sleeve provides a profile for landing and sealing the pod hanger and creates a barrier between the production tubing and the well casing. The lockdown ring mechanically secures the pod hanger assembly to the pod making it an integral part of the production string. A 10-foot-long casing pup joint made up to the pod hanger seal sleeve acts as a saver sub. The complete assembly is lifted using the Black Gator® Pod Sleeve Handling & Pod Pressure Test Tool.

### FEATURES

Seal profile for pod hanger

---

Landing shoulder for pod hanger

---

5-1/2", 7", 7-5/8" and 10-3/4" pod casing sizes available

---

Matched strength with production tubing

### SPECIFICATIONS

Low alloy steel or 13Cr material options

---

5,000 psi MWP as standard

Part Number	Pod Casing Size (in.)	Lower Pin Thread (in.)
