

Black Gator® Pod Casing

The Black Gator® Pod Casing is used to create the required length to shroud the electrical submersible pump (ESP), isolating the produced fluids from the well casing. The size of the pod casing is determined by the casing drift, the ESP series and pressure requirements. Where space is limited, flush joint casing is used.

FEATURES

Coupled or flush joint connections

API 5CT Range 2 length as standard (25-34 ft.)

5-1/2", 7", 7-5/8" and 10-3/4" pod casing sizes available

Thread connections to meet customer requirements

Box x Pin configuration

SPECIFICATIONS

Low alloy steel or 13Cr material options
